To research and develop the Te Arawa River Iwi Environmental Management Plan

The purpose of this project is to research and develop the Te Arawa River Iwi Environmental Management Plan.

The plan will overview iwi environmental, social, cultural and economic aspirations of the three TARIT affiliates; Ngati Tahu-Ngati Whaoa, Tuhourangi-Ngati Wahiao and Ngati Kea-Ngati Tuara, in relation to the Waikato River catchment.

It also includes policies, objectives and monitoring and reporting processes. It will also include examining resources such as the Waikato River and tributaries, indigenous flora and fauna, freshwater springs, lakes, indigenous fish species, geothermal water and features, farms, forests etc and how the use of these resources impacts upon the cultural, social, environmental and economic sustainability of iwi.

This project received funding from the Waikato River Authority (WRA 12-041)
