Dam name:						
Location of dam:	Address:					
(NZTM)	Easting:	No	orthing:			
Additional Notes (Refer guideline notes 3)						
Date of construction (year):						
Building consent number or identification: If applicable)						
Purpose of dam:	Agricultural/Pastoral/Irrigation Detention Hydro-electrical Power					
	☐ Tailings ☐ Water Supply ☐ Recreation/Amenity ☐ Treatment					
	Other					
Гуре of dam:	Earth Concrete Mixed Rockfill Unknown					
	Other					
Height of dam (in metres): 'Regulation 6 applies for the purpose of measuring a dam's height.	m	Dam's stored volume (in cubic metres): Regulation 7 applies for the purpose of measuring a dam's stored volume. (Refer Guidance notes 9)				
Relevant regional authority: (Refer Guidance notes 8)						
ection 2: Potential impact c	lassification					
otential Impact Classification etermined under section 134B of the B	uilding Act 2004 and regulatio	on 9 of the Building (Dam Safety) R	egulations.)			
High Med	dium) Low				
ection 3: Owner (Dam Own	er) (refer guidance no	ote 4)				
Name of owner:						
Chief executive of owner or eq	uivalent (if owner is a b	ody corporate)				
*if there is no chief executive, specify o		position in the body corporate.

Guideline notes

- 1. Council request the completion of some additional fields beyond the mandatory requirements of Form 1 of Schedule 3 of the Building (Dam Safety) Regulations 2022. This data will be used to update Council's Dam Register and enable a better understanding of the region's dam portfolio.
- 2. Fees and Charges Please refer to your relevant regional authority, as these costs / deposits may vary between councils.
- 3. Note: please provide any additional information regarding the dam, reservoir and/or owner details. E.g. list multiple owners if the dam straddles the boundaries of more than one property, or there are multiple dams on a single reservoir.
- 4. For the purpose of the Building Act and regulations, the 'dam owner' is the person who legally owns the physical dam itself. Typically, the landowner will also be the dam owner, however this will not always be the case as there are a variety of different scenarios when it comes to dam ownership. If the owner of the dam is not the same person as the owner of the land the dam is located on, there will likely be a record of this. Generally, where multiple people own the dam, they will collectively be the 'dam owner'. In most cases, it should be apparent who the owner/s of a dam is.
- 5. Multiple dams on a single reservoir All classifiable dams on a single reservoir must have there own dam classification certificate.
- 6. s134BA Classification of dams that are canals A dam that is a canal that must be classified under section 134B may have different classifications for different sections of the canal and in that case each of those sections must be treated as a separate dam for the purposes of sections 134 to 139.
- 7. s135 Owner must provide clarification to regional authority. [para] If already commissioned, provide within 3 months after commencement of regulations or 3 months after the dam is commissioned.
- 8. Regional Authority (For Marlborough District Council, refer to their website)

Auckland Council Hawkes Bay Regional Council Southland Regional Council
Bay of Plenty Regional Council Horizons Regional Council Taranaki Regional Council
Canterbury Reginal Council Nelson City Council Tasman District Council
Gisborne District Council Northland Regional Council Waikato Regional Council
Greater Wellington Regional Council Otago Regional Council West Coast Regional Council

9. Dam Stored Volume

Clarification to DSS Regulation 7, The Building Act, sec 7 "Crest" definition includes "For the avoidance of doubt, any freeboard is part of the water retaining structure. i.e. included in Dam Stored Volume"

This differs from: "Reservoir Capacity" i. e. The Typical volume of fluid stored up to the freeboard / spillway level and includes any fluid stored below the ground level of the dam.
