Website

This is a project to restore the Mangatea Stream and its tributaries including a number of wetlands.

The Mangatea Catchment Restoration Project is an intergrated to freshwater management project which will restore the Mangatea Catchment from its source to its confluence as it connects with the Waikato River. The Project is being led by Tauhei Marae on behalf of Ngaati Wairere. The Mangatea Catchment consists of the Mangatea Stream, its tributaries and a number of wetlands. Tauhei Marae will use Maataurana Maaori as a guide to restoring the health and well being of the Mangatea, contributing to the protection of the Waikato River. WRA15-003.
