

Waikato River Trails Riparian restoration

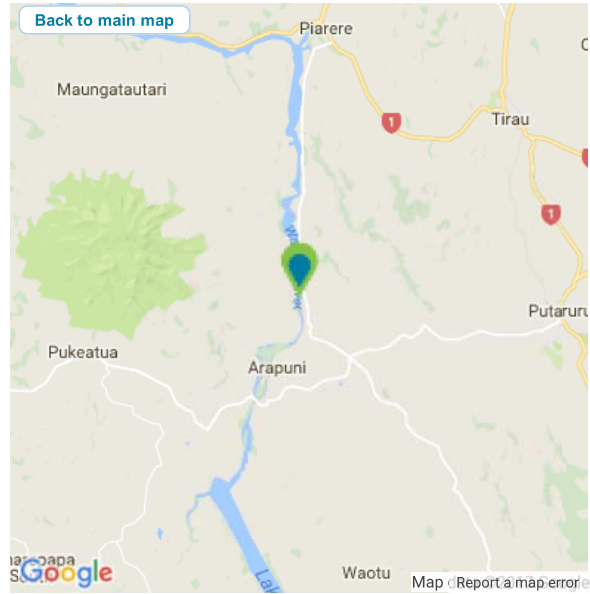

Glynn Wooller
07883 3720/0276429399

A continuation of planting and riparian enhancement on the Waikato River Trails.

The Waikato River Trails will be further developing its Environmental Vision linking riparian restoration with education and enhancement of the Waikato Region. Over the next three years further community planting is planned, with increasing numbers of plants to be established (approximately 20,545 per year is the target) but also it is essential to continue the releasing of these plants to ensure the success of this project. WRA 15-018.
